o the Soldiers of the 101st Airborne Division, Fort Campbell families, Screaming Eagle alumni and civilian employees of our post community: We are a nation at war. It is a war in which the safety of the American people is that end. The Army must threatened like it has never been. As we remembered the horrors of Sept. 11, 2001, this past weekend, we were reminded of the sacrifices we must continue to make in order to defend our way of life.

As so many of you know quite well, these sacrifices include long combat deployments for the Soldiers of our great Army. So many of our Soldiers and spouses endured a year without their loved ones while the 101st fought in Operation Iraqi Freedom. If the mission was easy, they wouldn't need our division. Each and every one of you deserves a Screaming Eagle challenge coin for your commitment to our mission.

I ask you now to keep your focus. As the War on Terrorism enters its fourth year, our division has been handed a

new mission. By March 15, 2005, we must be trained and ready under rapidly deployable and more lethal fighting formations. Starting today, we begin our execution towards change to meet its new challenges. This has included a number of new additions and subtractions to the 101st Airborne Division.

Indeed, our division scantly resembles the force that returned home from northern Iraq at the beginning of the year. We have reorganized our two aviation brigade combat teams to mirror each other's capabilities. We have created a Sustainment Unit of Action out of the elements of the

and changing our division train on new equipment, and then train headquarters into a unit of our units.

It will take the effort of each and every Soldier in our division, but there is no better division to lead the Army into the future. On March 15, 2005 - six months from now -- the 101st Airborne Division will emerge a vital part of a more joint capable, more expeditionary, more flexible Army.

We will be trained and ready to deploy in combat against any and all enemies of our country in this war.

Who better to lead our Army into this new era than this division? And who else but the outstanding Soldiers of this great division, who this time last year delivered hope to a nation locked in fear?

The Screaming Eagles have been called upon by our nation to lead our Army in new concepts of warfighting, while at war in the past.

Once again the 101st is called upon to lead a vital effort.

We will succeed!

Air Assault!

### **101st Aviation**

ransformation is affecting all aspects of the ■ 101st Airborne Division, creating a stronger, faster and more easily deployed unit.

A major component of transformation lies with the aviation brigades housed on Fort Campbell; 159th and 101st.

Before Army transformation began, 159th Avn. Bde., was purely an assault helicopter brigade, having no direct fire or attack assets.

The 101st Avn. Bde., was strictly an attack helicopter brigade, housing three Apache battalions, a Cavalry squadron Campbell and reactivate at Fort Bragg,

### Winds of change blow over rotors of aviation brigades

and a Command Aviation Battalion.

Each brigade is now being transformed into mirror images of each other -- having both attack and assault capabilities as well as the support personnel needed for

Each brigade will be made up of an attack battalion, an assault battalion, a cavalry squadron, a general support aviation battalion, or GSAB, and an aviation support battalion.

During the transformation to become "units of action," each brigade lost units. The 2/101st will deactivate from Fort

N.C. One assault battalion originally with the 159th has now been assigned to 3rd Infantry Division at Fort Stewart, Ga.

"Even though we've lost units, the brigade is actually going to be bigger," said Mai, Iim Adams, 101st Avn Bde executive officer. "We've added support battalions we didn't have before."

The aviation support battalion formerly with DISCOM -- 8/101st -- will be split apart. Half of the companies will ioin the 101st Avn. Bde., and half will be reactivated as the 9/101st under the

"Having these aviation support battal-

159th Aviation

ions is big," Adams said. "We will be able to almost completely support ourselves and it will give us a lot of flexibility."

It may be a while before the support battalions are operational since they are being built from scratch, Adams said. The equipment necessary for operation still must be acquired.

Once the transformation process is complete with each aviation brigade, they will have both light and heavy aircraft with attack and assault capabilities.

"We will have the best of everything,"

Division Support Command has accepted

Several Soldiers moving from DISCOM to infantry brigades will be taking on that brigade's heritage. They will now have a history to their brigade, said Lt. Col. Randy Patterson.

The name is changing as well. DISCOM will become 101st Sustainment Unit of Action, completely separate from Division Headquaroperation.

The only certainty these days is change.

The structure of the Army is changing, and with it the structure of the family readiness groups at Fort Campbell. As part of that change, eight civilian workers were hired in June to act as FRG assistants on post.

One assistant works in each brigade combat team with the eighth acting as a supervisor -or site manager -- to the others and as the FRG assistant for the newly realigned division headquarters.

"We are a part of FORSCOM initiative," said Robin O'Sullivan, FRG site manager and assistant to the UEX. "The program came after officials recognized the stress of the rapid deployment of the Army, the pace of the Army, the strain that is on FRG volunteers. They recognized the need to augment the volunteer core."

The assistants will act as way down from the brigades

Family readiness groups have received a full-time staff of paid employees to help keep vital programs running equally.

#### Who are they?

Fort Campbell hired eight civilian employees to operate as liaisons between the command and the family readiness groups. They are:

"The FRG leaders are tired Site Mgr -- Robin O'Sullivan and they need support," said 1st BCT -- Charlene Thomason Kimberly Arne, Division Sup-2nd BCT -- Heidi Melvin port Command FRG assistant. 3rd BCT -- Cheryl Burns "This program is to help them 4th BCT -- Jennifer Banks continue their mission to help 101st Avn -- Karla Sketch 159th Avn -- Rhonda Klinger One mission the new 101st Spt -- Kim Arne assistants have is helping

to the smallest platoons."

In addition to married Soldiers, FRG assistants are attempting to make the groups attractive to single Soldiers.

The biggest advance anticipated is a new Web site for a virtual FRG.

The aim of the group is not to replace the all-volunteer FRG system, but to augment it. The volunteer groups will often shift as members PCS or come, are getting information ETS.

> "During deployments, as volunteers come and go, we will be the continuity," Thomason said.

"We will be the steady source of referrals, the point that is not changing."

In addition, the assistants will inform both the UA and the FRG leaders of regulations.

"It is an awesome task to be an FRG leader," Thomason said.

Because the FRG system is volunteer based, all the rules, regulations and resources are hard for leaders to keep track of in the midst of their own lives and trying to guide others. This is where the assistants work. With 22 percent of resources being referred, the group wants to improve usage of aid agencies to 100 percent, Arne said.

During a deployment, the staff is able to support the rear detachment commander.

Division Soldiers work in coordination with a Chinook helicopter at a post training exercise. Under modularity, division headquarters will have capabilities currently found at the corps level.

### **Division headquarters takes on** new role as corps level support

by Pfc. Brett Townsend brett.townsend@us.army.mil

> Joint, expeditionary and modular; these three terms describe and more varied groups, it was the basis for all the transformatsions taking place in the Army today and in years to come.

> In times past, the Army tackled operations by "borrowing" slices of necessary components to complete a mission. Now, the need to borrow slices of Wilson said. "Essentially, our different combat and support elements will no longer be a increasing.' necessity.

plans and operations at the 101st Modularity Coordination Cell, works daily to aid in happen.

"The whole idea is to focus on the brigade combat team to make all the brigades the same," Wilson said.

In addition to increasing the operating size of most units and companies, the headquar-

### Did You Know?
